WATH IS CRYPTO CURRENCY ?

Cryptocurrency is a term for digital currency that can be used for transactions between users without the need for a third party. Cryptocurrency transactions originate from a network of computers that use specific computational algorithms. This mathematical computation is called cryptography, which utilizes blockchain technology. Bitcoin is the first and largest type of cryptocurrency.

"By using cryptography for security, it becomes tamper-proof. Mostly determined by the buying and selling power of the users of this technology."
